

AI365 for Business Central

PREFACE

AI365 brings the power of Artificial Intelligence directly into Microsoft Dynamics 365 Business Central, enabling you to take immediate advantage of intelligent boosters and Copilot functionality without requiring deep AI expertise.

With AI365 you can seamlessly enhance your daily business processes through ready-to-use AI components ("Boosters") designed and managed by Bravx. These boosters support tasks such as text and data generation, translations, communication improvements, and other context-aware assistance that increase productivity and reduce repetitive work.

By connecting Business Central to AI365, your organization gains access to a centrally managed prompt management layer and Azure AI services, ensuring secure, scalable, and continually updated AI capabilities. With AI365, you take control and accelerate the adoption of AI in your business in a practical, safe, and user-friendly way.

INSTALLATION

Go to AppSource to install AI365 for Business Central.
